

Effects of a LEFT hemisphere stroke in the brain

- Right-sided weakness or paralysis and sensory impairment
- Problems with speech and understanding language (aphasia)
- Visual problems, including the inability to see the right visual field of each eye
- Impaired ability to read, write, and learn new information
- Memory problems

Call 999 or get a family member or friend to drive you to the hospital, **STROKE** is still an **EMERGENCY!**

Act **FAST!** in the **GOLDEN HOUR** to
minimise these effects
